CLOUD FORWARDING SUITE

we'll get to the root of your problem

The NovaSystems software solution for shipping, transportation and logistics.

NovaSystems IT innovation takes form in the BeOne solution: the highly functional software instrument for business productivity.

Claudio Bassi, Managing Director of Pacorini Forwarding, is the testimonial for Nova Systems' reliability. Pacorini Forwarding is the leader in international project cargo logistics. Company partnered with FIATA and IATA.

Since when did you choose the Cloud Forwarding Suite Solution?

"Ten years ago, immediately after founding our company we chose a company, of those many present on the market, that would better know how to sustain us in the start-up of our business. Therefore, we chose Nova Systems who, thanks to the BeOne solution, allowed us to concentrate our energy and resources on our core business right from the beginning, without forcing us to dedicate time and investment on a technical infrastructure needing installation, maintenance and technical assistance aspects contemplated in software applications for shippers. Our company computerization has been entirely delegated to Nova Systems experts."

In what way did you delegate to Nova Systems your IT infrastructure?

"It was enough to just connect to BeOne with a telecommunications line expressly dedicated and secure so as to access all data regarding our offices in Genova, Milan, Bergamo and Vicenza all at the same time. All the individual work sessions are connected to each other 24 hours round the clock from anywhere in the world. Our business data represents our most important industrial secret and Nova Systems guarantees that security cannot be breached. The safeguarding of our company privacy is 100%."

What are the virtues of the BeOne Cloud Forwarding Suite solution?

"BeOne greatly impacted the consolidation of our business activity: it regards uniting services with products which correspond to our actual needs. The principal quality of BeOne is its flexibility: you only use those applications that interests your company organization. The Nova Systems solution allows the daily sharing of data on a platform that is shared with our correspondents, agents, carriers and suppliers regarding

our business. Being able to store electronically our documents is another important component of the BeOne solution where we are able to access "company history" so as to reconstruct each passage of a single shipment."

What advantages do you gain from all this?

"The BeOne solution, besides being economically lucrative, facilitates company trend analysis through evolved Business Intelligence tools: an opportunity absolutely necessary in the global economic crisis we are currently going through and requires the readiness to adopt the most opportune business strategies. We export and import sizable machinery, industrial implants and oversized loads. Each shipment is traced by a specialized team that organizes and executes the complex phases of the shipment. The BeOne solution makes us largely operational in addition to being highly competitive."
